

Managing Lift Truck Safety & Efficiency

SkidLevel Load Leveling Indicator

Managing Safety

Damage to product and infrastructure by loads that are not at the proper angle are a common occurrence in most material handling applications. Fortunately, these occurrences can be controlled in a safe, affordable way with the SKID-LEVEL load level indicator.

Reduce potential damage to racking, pallets and product by always leveling your forks or attachment at any height.

The IVDT “SkidLevel” series load level indicators are a simple, effective and very affordable product that allows the user have a clear understanding of how level their load is no matter what attachment they are using, or how high the product may be.

For more information, visit us @ www.ivdtsolutions.com

The SkidLevel Digital load level indicators allow you to manage and control the following:

Improves Safety

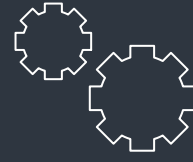

- Operator can monitor mast angle at all times at any height
- Prevents pallet stringer lift-off by misguided forks
- Reduces accidents caused by misaligned forks
- Allows for correct fork angle while traveling
- Reduces strain on operators while adjusting fork angle at height
- Prevents tripping accidents by allowing for proper angle for lowered forks.

Reduce Damage

- Reduces damage to racking and property
- Reduce piercing by forks to palletized product
- Reduce damage to paper rolls by misaligned clamp
- Reduce damage to cartons by misaligned clamp

Increase Productivity

- Increase speed of loading and unloading product
- Increase speed of product put-away (even at extreme heights)
- Effective training tool for new operators

CUSTOM SOLUTIONS

We recognize that not every situation is the same.

Contact one of our specialists today for a solution that is customized to your unique requirements, for your unique application.

WEB SOLUTIONS

Utilizing cloud technology, IVDT can provide you with “Real-Time-Data” so you can effectively manage your impact events. Customized reporting and alerts can be accessed through most computers and smart phones.

COST SAVINGS SOLUTIONS

Properly managing the information related to your impact events is the first step in controlling the escalating costs associated with these occurrences. A IVDT solution can assist in minimizing these costs
